Parker Legris: LIQUIfit® Connection Solutions for Beverages & Fluids

ENGINEERING YOUR SUCCESS.

The Fluid System Connectors Division (formerly Legris) of Parker Hannifin, the global leader in motion and control technologies, has launched **LIQUIfit®** and **LIQUIfit+**, 2 new “eco-designed” ranges of leak-free and compact push-in fittings, tubing and complementary products for liquid transfer applications.

The **LIQUIfit®** range is suitable for liquid transfer applications: food process, drinks dispensers, water purification systems...
This product range also benefits from a range extension of metal adaptors designed for liquid transfer applications.

LIQUIfit+ provides zero retention push-in fittings for 100% cleanliness. The innovative sealing and gripping design drastically reduces bacteria growth, giving 100% cleanliness.

LIQUIfit+ fittings are intended for use in applications concerning the dispensing of liquids and beverages (including beer lines) and offer many sustainability-related benefits.

Part Number Identification

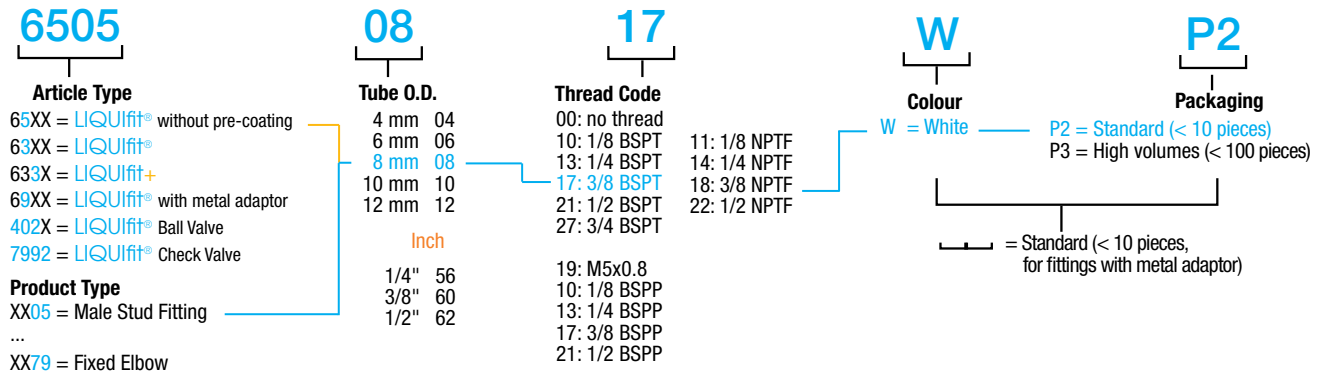

The part numbers used for our product ranges are coded in such a way as to make it easy to identify any particular item.

Part Number Construction for Fittings and Valves

The part numbers are selected using a technical mnemonic code.

Each fitting and valve is identified by:

- model series (4 digits)
- nominal diameter (2 digits)
- thread or 2nd nominal diameter (2 digits)
- a suffix, if applicable

Part Number Construction for Tubing

The part numbers are selected using a technical mnemonic code.

Each tube is identified by:

- model series (4 digits and a letter)
- nominal diameter (2 digits)
- colour (2 digits)
- inside diameter, if applicable

Nominal diameter code: equates to the outside diameter.

Colour code: see table below.

00 = □ (clear) 01 = ■ 02 = ■ 03 = ■ 04 = ■ 05 = ■ 10 = □ (white)

Environmental Approach

The Life Cycle Analysis (LCA) offers a true alternative in terms of environmental differentiation.

We carried out a comparative LCA on the market of drinking water between 3 Parker Legris fittings and the standard products on the market.

This analysis relies on ISO 14020, ISO 14025 and IEC PAS 62545 standards and the results are presented in a report approved by an ethics committee (Bureau Veritas).
