

## Datasheet of WSE 13 GT WaterProfi-screwing hose stem

### Description

WaterProfi-screwing hose stem G3/4" AG, DN 10, for hose 1/2" (13 mm), stainless steel

WaterProfi screwing hose stems **series WSE** are made of stainless steel which offers a more robust and wear resistance vs other couplings made of plastics. Furthermore the stainless steel couplings can be used in applications with special sanitation requirements or for hot water (e.g. for cleaning in food industry). The one-hand operation guarantees a simplified work and an optimum ease of use. WaterProfi products are outfitted with O-rings to offer best sealing characteristics. That means: leakages can be avoided with the coupling system as often seen with pre-mounted compression fittings now in the past.

### Details

Series:	WSE
Series long:	WSE
Bore:	DN 9
Maximum working pressure in bar:	PN 16 bar
max. temperature in °C:	+95°C
Connection:	Hose barb 13mm LW(1/2")
Material:	stainless steel AISI 303
Weight in kg:	0,035

### Dimensions

B mm:	26,5
L mm:	41
