

Datasheet of W3605000001 – Two hand safety valve

Description

Two hand safety valve

Safety valve for Two hand safety module.

The most common application involves connecting a manual button-controlled valve to each of the inputs and using the output signal as a start-of-cycle control for a pneumatically-operated machine.

Details

Flow rate in l/min:	85 (at 6 bar)
Medium suitability:	Gefilterte, ungeölte Druckluft max 50 µm
Working pressure:	2,5 – 8 bar
Bore in mm:	2,7
Material spring:	Stainless steel
Material body:	Technopolymer
Weight in kg:	0,04

Dimensions
