

Datasheet of 9065709 – IN-LINE STOP VALVE thread-pipe 1/4-Ø6

Description

Inline stop valve, thread-pipe, 1/4-Ø6, 10 bar

The STP L stop valve belongs to the LINE ON LINE® family and can be connected in series or in parallel with the other products in the same family.

It is available in a version for pipe-pipe connection, which includes two push-in fittings, and a version for thread-pipe connection, which includes a nickel-plated brass male thread and a push-in fitting.

The stop valve is normally mounted on the inlet port of cylinders and allows the flow of air only in the presence of a pneumatic pilot. Cylinder movement ceases if there is a drop in pneumatic pilot pressure.

The compressed air port is a push-in fitting for Ø 4 pipe.

This stop valve is available in a unidirectional version, so the flow can be interrupted in one direction, but remains free in the other direction.

This valve can also be used as a unidirectional normally-closed 2/2 pneumatic control valve.

Details

F:	1/4
B:	43,2
C:	14,7
Ch1:	14
E:	18
