

Datasheet of DSG-01-36HL Geared Sander

Description

Geared sander, central-vacuum, pad face hook & loop, 152 mm, 424 l/min

Durable:

- Machined steel gears for longer life and performance
- Double output bearing design and hardened alloy steel cylinder extends life
- Epicyclic sanding pattern allows for aggressive removal of material

Ergonomic:

- Soft grip, insulated handle reduces vibration
- Rear exhaust to direct air away from user
- Lever type throttle for comfortable operation and reduced fatigue
- Long handle allows for twohanded support of tool

Versatile:

- Central vacuum and nonvacuum options available
- 6" and 8" pad sizes
- 900 RPM allows for aggressive removal applications
- Available with both PSA and Hook & Loop pads

Sanding pattern:

Details

Idling speed rpm:	900
Flow rate in l/min:	424 (at 90psi)
Orbit:	5 mm
Vacuum type:	Central-Vacuum
Pad face:	Hook & Loop
Weight in kg:	1,6
Pad size in mm:	152

Dimensions

H mm:	119
