

Datasheet of 492-A-PZD Pozidriv® bit

Description

Pozidriv® Bit, PZ2, 70 mm length

Pozidriv is a development of the Phillips cross head for higher speed screwdriving in torque-limited machines. In contrast to the Phillips profile, the flanks of the output are milled plane-parallel. As a result, they do not taper and the larger surface makes it easier to screw in the screw.

To avoid confusion with the Phillips profile, four lines are marked at a 45° angle on the screw head. Pozidriv screwdrivers cannot be used with Phillips screws. Conversely, Phillips screwdrivers can be used to a limited extent with play.

Details

| Size: | PZ2 |
|-------------------------|---|
| Length in mm: | 70 |
| Form: | E |
| Additional information: | Meets industrial requirements |
| Drive: | 1/4" Sechskant |
| Material: | High-alloy tool steel, heat treated |
| Advantages: | no chrome vanadium, but tool steel (does not splinter when overloaded) Suitable for hand tools and rotating tools |

Dimensions
