

Datasheet of Silicone oil for quick couplings

Description

Silicone oil, 20 ml, brush bottle

For maintenance of quick couplings and plugs.

Increase the life of your quick connectors with regular care with this silicone oil. Simply paint the plug with the brush before coupling. In the case of quick couplings without a valve, oil can also be applied directly into the opening of the quick coupling.

Clear, colorless, non-toxic, neutral & odorless.

Permanently heat-resistant in air up to approx. +180°C.

Lubricating property between -60°C to +200°C.

Non-flammable.

Low surface tension.
