

## Datasheet of SMA3-400CF SensoControl Measuring hose

### Description

Measuring hose, length 400 mm, up to 630 bar, -20 to +100 °C

For pressure monitoring and control of high pressure, low pressure and vacuum systems. For venting cylinders and hydraulic systems.

The connection between the measuring connection and the sensor is either direct or, in the case of cramped conditions, via an SMA hose. The measuring hose also decouples the sensor from vibrations and oscillations.

### Details

Length in mm:	400
Bend radius:	20
Weight in kg:	0,076
Material:	Steel
Maximum working pressure in bar:	630
Working temperature:	-20°C to +100°C
Material seal:	NBR

### Dimensions

Size connection 1:	M 16x2
Size connection 2:	M 16x2
Connection 1:	M16 test point connector
Connection 2:	M16 test point connector
Length in mm:	400
Bend radius:	20
