

Datasheet of 95SSTF09MXN Plug with hose barb

Description

Plug safety straight through, hose barb 9mm (3/8), nominal diameter 7,4, <35 bar, brass nickel plated

This coupling system has been developed specifically for the area of breathing protection. Coupling system with single-hand operation. UltraFlo valve for optimum flow and low pressure drop. Additional safety locking system. This safety lock prevents unintentional disconnection. To disconnect, the plug must first be pushed further into the coupling before it can be unlocked. Profile cannot be interconnected with the 96KS series. Tested according to EN 139 standard.
