

## Datasheet of 1050T08A01 Fluoropolymer hose (PFA)

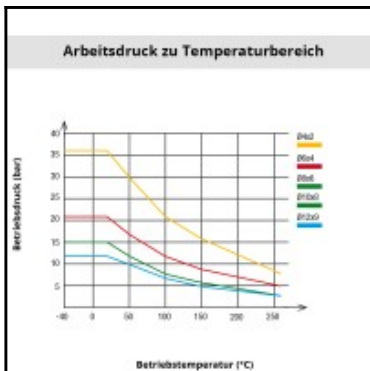

### Description

Fluoropolymer tubing (PFA), anti-static, outer diameter 8 mm, inner diameter 6 mm, black, length 50 m

Black anti-static PFA tubings (resistivity =  $0.25 \text{ W} \cdot \text{m}$ ) to prevent all electrostatic discharges in most aggressive environments in order to guarantee a very high security level. Our range of PFA tubing covers a broad range of working temperatures, from cryogenic to extremely hot (+260°C) and of pressures (up to 35 bar). The diameters 10 and 12 mm in 50 and 100 m are available upon request only.
