

Hose balancer ATR-5

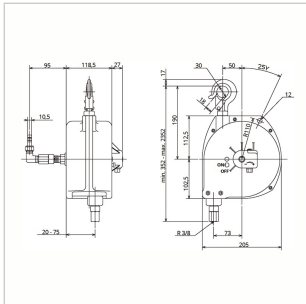

Hose balancer, payload range 3,5 - 5 kg, cable length 2 m, with connection R 3/8"i., air connection R 3/8"i., automatic locking

Product description

Industrial hose balancer with automatic withdrawal of the hose. The inner diameter of the hose (10 mm) ensures appropriate air supply for larger tools. A ratchet mechanism can be activated separately for positioning the tool in any desired height. A safety lock prevents the hanged tool from falling if the spring breaks. Extension hoses for work in great heights are optionally available. connection R 3/8" to air supply and R 3/8" on the tool.

Product properties

Fall protection	Preparation existing
Connection (casing)	Female thread R 3/8"
Connection (hose)	Female thread R 3/8"
Locking	Yes
Suspension	Turnable carabiner
Spring fracture protection	Yes
Weight in kg	3,8
Material casing	Plastic
Maximum working pressure in bar	8
Cable stop	Yes, adjustable
Series	ATR
Series long	ATR
Payload range in kg	3,5 - 5
Load setting	External hexagon

Dimensions

Hose Inner diameter in mm	10
Cable length in m	2
