

MUB 23-55 F100 Air motor

Air motor, reversible, speed under load 55 rpm, torque 40 Nm, holding load of brake 60 Nm

Product description

The robustness distinguishes the air motor as unproblematic drive engine. It is well utilised in industrial sectors where accuracy and longevity are required. Its high starting torque and the wide torque range qualifies it for many needs in the drive section. The model **MUB 23** is equipped with a **brake actuated by force**. This brake is controlled directly with the ingoing air line. No further guiding hoses are necessary. The maximum brake force is equal to the starting torque.
