

WSE 16 GT WaterProfi-screwing hose stem

WaterProfi-screwing hose stem G3/4" AG, DN 13, for hose 5/8" (16 mm), stainless steel

Product description

WaterProfi screwing hose stems **series WSE** are made of stainless steel which offers a more robust and wear resistance vs other couplings made of plastics. Furthermore the stainless steel couplings can be used in applications with special sanitation requirements or for hot water (e.g. for cleaning in food industry). The one-hand operation guarantees a simplified work and an optimum ease of use. WaterProfi products are outfitted with O-rings to offer best sealing characteristics. That means: leakages can be avoided with the coupling system as often seen with pre-mounted compression fittings now in the past.

Product properties

Connection	Hose barb 16mm
Seal	EPDM
Weight in kg	0,039
Material	stainless steel AISI 303
Maximum working pressure in bar	PN 16 bar
max. temperature in °C	+95°C
Bore	DN 9
Professional recommendation	Water
Series	WSE
Series long	WSE

Dimensions

B mm	26,5
L mm	41
