

Air motors 0,13 kW

Air motors, reversible, speed under load 200 - 2.300 rpm, torque 0,54 - 6,2 Nm, start torque 0,81 - 9,3 Nm

Product description

The robustness distinguishes the air motor as unproblematic drive engine. It is well utilised in industrial sectors where accuracy and longevity are required. Its high starting torque and the wide torque range qualifies it for many needs in the drive section. **Reversible motors** can be used rotating clockwise and anti clockwise. It is very important that if the air motor is pressurized with connection turning the air motor left, the connection turning the air motor right is vented properly (and vice versa).
