

1010T..A - Fluoropolymer tubings (PFA), anti-static

Fluoropolymer tubings (PFA), anti-static, length 10 m

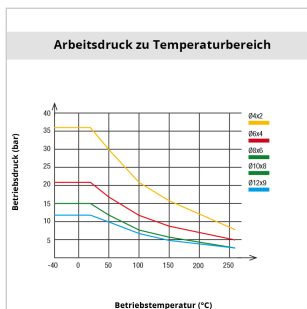

Product description

Antistatic grade PFA for our black tubing (resistivity = $0.25 \text{ W} \cdot \text{m}$) to prevent all electrostatic discharges in most aggressive environments in order to guarantee a very high security level.

Our range of PFA tubing covers a broad range of working temperatures, from cryogenic to extremely hot ($+260^\circ\text{C}$) and of pressures (up to 35 bar). **The diameters 10 and 12 mm in 50 and 100 m are available upon request only.**
