

Grinding machines 10.000 rpm

Idling speed 10.000 min⁻¹, 1300 Watt, safety lever

Product description

- Comfortable use by a safety valve embedded into the hand grip
- Ideally for internal grinding, deburring of hollow spaces (e.g. motor blocks, tubes, turbine blades) and for finishing welding lines
- Robust extensions with easy changing
- Max. neck extension length up to 1000 mm ensure working in difficult to access areas
- Built in speed governor keeps the revolutions on load nearly constant
