

# EBM 19000 S-ST Air motor for drilling

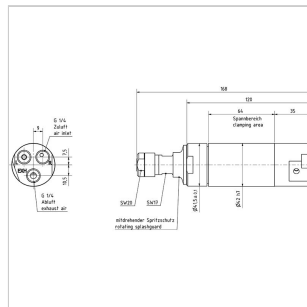

19000 min<sup>-1</sup>, 380 Watt

## Product description

- To adjust the optimal speed under load
- To compensate the wear of tools
- To inform that the tools need to be changed to to wear
- To prevent collision
- To recongize in time the wear of the motor if speed reduces
- stainless steel housings
- With collets for high precision
- Ideal for drilling or brushing

## Product properties

|                                                      |                    |
|------------------------------------------------------|--------------------|
| Exhaust Air                                          | to rear            |
| Anschluss Zuluftschlauch (Blitz) ø mm, innen \ außen | 10 \ 12            |
| Item number                                          | 60054917           |
| Direction of rotation                                | Rotating clockwise |
| Speed sensor                                         | prepared           |
| ER collet in mm                                      | 6                  |
| Noise level in dB(A)                                 | 72                 |
| Weight in kg                                         | 1,12               |
| Idling speed rpm                                     | 19000              |
| Power in kW                                          | 0,38               |
| Air consumption in l/s                               | 8,5                |
