

SMA3-4000CF SensoControl Measuring hose

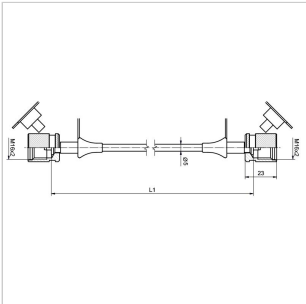

Measuring hose, length 4000 mm, up to 630 bar, -20 to +100 °C

Product description

For pressure monitoring and control of high pressure, low pressure and vacuum systems. For venting cylinders and hydraulic systems. The connection between the measuring connection and the sensor is either direct or, in the case of cramped conditions, via an SMA hose. The measuring hose also decouples the sensor from vibrations and oscillations.

Product properties

Weight in kg	0,15
Material	Steel
Maximum working pressure in bar	630
Working temperature	-20°C to +100°C
Material seal	NBR

Dimensions

Connection 1	M16 test point connector
Connection 2	M16 test point connector
Bend radius	20
Size connection 1	M 16x2
Size connection 2	M 16x2
Length in mm	4000
