

## WL 10 NA WaterProfi-plug G 1" AG

WaterProfi-plug with male thread (valve adaptor) G 1" AG, brass nickel plated, DN 16

### Product description

WaterProfi plugs series WL are completely made of brass MS 58 which offers a more robust and wear resistance vs other couplings made of plastics. The one-hand operation guarantees a simplified work and an optimum ease of use. WaterProfi products are outfitted with O-rings to offer best sealing characteristics. That means: leakages can be avoided with the coupling system as often seen with pre-mounted compression fittings now in the past.

The **series WL** with extra large through-hole is ideal for water supply in industry, craft, agriculture and horticulture.
