

968883PT Isolated quick change adaptor

Isolated quick change adaptor, Hex 1/4", Output Hex 1/4"

Product description

Apex offers high-voltage insulated adapters and quick-change adapters, both of which can be used with all free-spinning U-Guard products. This adaptable system ensures flexibility due to countless possible combinations. The adapters make special insulated socket wrenches unnecessary. The safety of your team comes first.

The insulated adapters and bit holders offer protection when screwing up to 1000 volts. This increases safety, especially when working on electromobility.

Together with extensions, u-Guard products and bits, the insulated adapters and bit holders offer numerous combination options.
