

4204 - Axial valve

Axial valve, normally closed, female thread, with detection

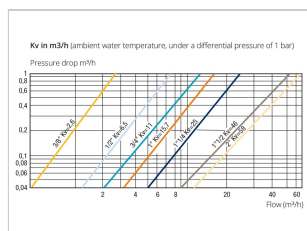

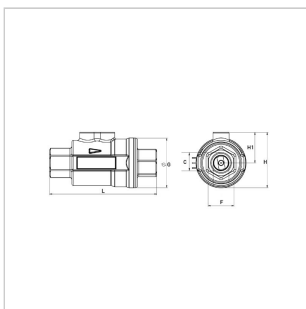

Product description

The Parker Legris axial valve has a pneumatic actuator and can be integrated into automated systems pneumatically or electro-pneumatically (with NAMUR or solenoid valve). It is available with or without detection.

Product benefits:

- Compact size: 5 times more compact compared to a valve with a separate actuator
- Easy installation - ready to use immediately
- Increased safety by automating hazardous tasks
- Available with detection for precise feedback
- Anticipation of failures through diagnostic and predictive maintenance
- Integration with other systems
- Pneumatic or electro-pneumatic actuation
- Full flow with low pressure drop
- Excellent performance at high pressures and temperatures
- Compatible with a wide range of industrial media

Product properties

Number of connections	2
Function	normally closed
Maximum working pressure in bar	10
RoHS compliant	Yes
Material body	Brass nickel plated

Dimensions
