

mPro250-AP-BT Controller

Nutrunner controller for wireless assembly tools by Cleco, with access point and Bluetooth

Product description

Controller for use with a **CellTek**, **CellCore**, **CellClutch**, **LiveWire** and **Freedom** series cordless hand tool.

- Superior efficiency with the upgraded touchscreen and operating system that provides performance up to 6 times faster than mPro200 controllers.
- Simple Integration - The mPro250 Controller accommodates up to 16 cordless tools in a single controller, streamlining tool management and boosting productivity.
- Comprehensive Connectivity - Access outstanding connectivity through the integrated access point with extended Wi-Fi coverage of up to 183 meters. Take advantage of improved upload speeds and support for both 2.4 GHz and 5 GHz Wi-Fi networks, plus optional Bluetooth® 5.1 capability.
- Advanced Security & Personalization - A premium operating system featuring open-source flexibility, dependable security, and comprehensive customization options—built-in encryption provides critical network protection for your complete security.
- User-Friendly Touch Screen - Intuitive touch screen interface allows straightforward programming and rapid access to tightening data.
- Versatile Connectivity - Maintain connection through Wi-Fi 5 and Bluetooth 5.1 for smooth tool integration, hassle-free data exchange, and continuous workflow.
- Universal Mounting for Seamless Integration - Compatible with existing controller system mounts for trouble-free installation.
- Convenient Data Access & Software Updates - Easily accessible USB ports and front-mounted internal storage deliver faster servicing and straightforward software updates when needed.
