

WPI 16 GT WaterProfi-screwing hose stem

WaterProfi-screwing hose stem G3/4" AG, for hose 5/8" (16 mm), brass nickel plated, DN 9

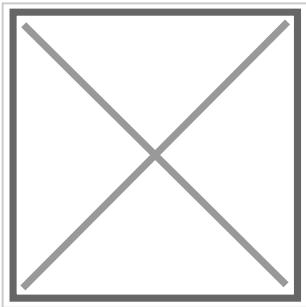

Product description

The WaterProfi components are made entirely of nickel-plated brass, making them more robust and less prone to wear than comparable plastic products. To guarantee even easier operation, the [quick-release couplings](#) have been fundamentally optimized. The new WPI series replaces the previous WPN and WS series and offers numerous advantages: The new, compact version is characterized by its extremely low weight. Thanks to a new industrial valve, the WPI series achieves 20% more flow and features a wrench flat on the connector for easier assembly. The sleeve contour and ball locking mechanism ensure significantly easier one-handed operation, greatly reducing workload. The smooth surfaces reliably prevent dirt from accumulating and allow for effortless cleaning.

Of course, the quick-release couplings are compatible with all standard plug-in profile types and can be ideally combined with the WaterProfi spray nozzle and watering device.

Hose clamps or hose clips are required for proper attachment to the hose. Please see the "Accessories" tab for more information.

Product properties

Old order number	WS 16 GT, WPN 16 GT
Connection	Schlauchanschluss 16mm LW(5/8")
Seal	NBR/HNBR
Single-hand operation	Yes
Flat-sealing	No
Weight in kg	0,031
Material	Brass nickel plated
Maximum working pressure in bar	PN 16 bar
max. temperature in °C	+95°C
Bore	DN 9
Professional recommendation	Water
Safety locking system	No
Water-resistant	Yes
Two-hand operation	No
Series	WPI
Series long	WPI

Dimensions

L mm	31
L1 mm	22,5
L2 mm	9
