

482725A5 Coil for solenoid valve

32 mm Coil for solenoid valve, 110 V AC / 50 Hz, 8 W

Product description

These high-quality 32 mm coils for FCSE solenoid valves are specifically designed for absolute reliability, even under the most demanding conditions in industrial and process engineering. Their exceptionally robust construction features internal pole expansion, which optimizes the magnetic field and guarantees consistent performance – even in the event of voltage drops or thermal stress. Thanks to a wide range of international certifications, including UL, CSA, VDE, CE, UKCA, and EAC, this component is ideally suited for global use in diverse market segments. This makes the coil a future-proof solution for demanding applications in general manufacturing and complex processing technology.

Product properties

Weight in kg	0,145
Series	Lucifer
Voltage	110 V AC / 50 Hz
Working temperature	-40°C to +50°C
Power in W	8
Professional recommendation	Fast delivery programm

Dimensions
