

Oil trap

Oil trap, G 3/4"

Product description

- Exhaust air is collected centrally
 - Unoiled compressed air streams into the environment (filtering up to 99%)
 - Residual oil content at the outlet at max. 900 l/min: 0.01 mg/m³
 - The pressure dew point must be at least 15°C below the ambient and medium temperature and must not exceed 3°C
 - The oil content of the compressed air must remain constant throughout its entire service life
-
- 2 threaded connections G 3/4"
 - max. operating pressure 16 bar
 - nominal flow Q_n 12000 L/min
 - temperature range - 20 °C until + 120 °C
 - weight 0,58 kg

Product properties

Connection	Female thread 3/4"
Weight in kg	0,58
Maximum working pressure in bar	16
Working temperature	-20°C up to +120°C
Item number	60070826

Dimensions

SW mm	41
